

Audio/Visual Team

We need help!

At least 2 - 3 more team members would be great. Need at least one back of the house to work in the office preparing media for recording (tape & disk labels), copying and computer & copier maintenance. Same person(s) can also assist in the sound & light booth. With video recording and web upload/streaming there is going to be additional effort that we don't currently experience to know how much additional time will be needed.

Right now we have 2 members cover the 1st service - one to manage the sound board & the 2nd to cover the tape & audio disk recording. This could be handled by 1 since there are no lighting changes. When video recording is involved it's definitely going to require 2 in the booth. One person needed for the 2nd service when it's just the sound board monitoring needed.

Currently Dave Lopez, Gordon Smith & Lou Browdy cover both services one month per quarter and Daniel Gates is the 2nd member during the 1st service. It hasn't been too much of a problem when one of the 4 of us isn't available for a scheduled shift since there is usually one of the other 2 that can cover.

Depending on how many additional team members we will end up with, the schedule can be adjusted so each person can be in the booth no more than 1/2 the scheduled services. Also with more trained team members it will be easier to schedule other events - weddings, memorial services, concerts, retreats, etc
