

Rules for the Development and Processing of new Study Proposals

A member, who wishes to propose a new study shall make a summary of the proposal in the form of a “Protocol Synopsis”.

- 1 The synopsis is send to the datacenter.
- 2 The datacenter sends the synopsis to all members in the CTU advisory board for comments
- 3 A response is given to the proposer within one month.
- 4 When a majority of the CTU advisory board members are in favor of the principles in the proposal, the CTU takes part in the further development of a protocol.
- 5 The nest step will be to revise the synopsis according to the comments from the advisory board.
- 6 Economic support is sought
- 7 The revised synopsis is send to all institutions to ask for preliminary commitment.
- 8 With sufficient economic support and patient recruitment, a full protocol is developed in cooperation between the CTU and the principal investigator.
- 9 CRF's are developed in cooperation between the CTU and the principal investigator.
