New Features: *Scales and Keys*

Typical Bracket assembly on a pharmaceutical labeling machine

- ✓ Brackets have handles for easy, quick, repeatable changeover with accurate setup.
- ✓ No tools are required and setups can be documented
- ✓ Keys prevent rotation of the camera when handles are loosened, and camera position can be adjusted very easily.

This setup shows a camera, and and light with 2 axis (horizontal and vertical) adjustment for movement of camera and light when label size changes for different bottle sizes
