- Create voice records for any number of children

Price: US\$89 (Special Offer US\$139 for both the TeachingPix2 and SpeakingPix)

Minimum Requirements

Microsoft Windows 95, 98, 2000, ME, NT or XP operating system
IBM Compatible PC with 200 MHz processor
64 Mb RAM
CD-ROM or DVD drive
200 Megabytes of free disk space
SVGA monitor
Multimedia system with sound card and speakers
Mouse or touch screen

CompuThera

This CD-ROM offers a seven-step gradual discrete approach for teaching reading. It has been designed for children having trouble learning by observation alone. It is aimed at visual learners and children whom traditional classic educational methods cannot motivate. Children with Autism fit this category; that is why CompuThera will benefit them most. Targeting both receptive and expressive cognitive skills, the CompuThera treatment plan builds on mastered items to progress through the program using simple drills, eventually leading to reading simple sentences. The ability to read often triggers in autistic children the conceptual leap leading in breakthrough in communication. The CD-ROM comes with full instructions and a *'Seven-step to reading for Visual learners and children with Autism'* Therapists Manual. Users also receive online technical support.

Price: US\$117

Minimum Requirements

Microsoft Windows 95, 98, 2000, ME, NT, XP or Vista operating system
IBM Compatible PC with 200 MHz processor
64 Mb RAM
CD-ROM or DVD drive
700 Megabytes of free disk space
SVGA monitor
Multimedia system with sound card and speakers
Mouse or touch screen

Discrete Trial Trainer

This CD-ROM is a robust discrete trial program that can be tailored to fit an individual child's abilities. The educational content is for children developmentally between the ages of two and nine. There is a broad curriculum on early targets such as letters, numbers, shapes and colors which then moves on to prepositions, adjectives, pronouns, verbs and conceptual thinking. The curriculum includes praising and a wide range of reinforcers. In addition to the extensive curriculum, the DT Trainer also provides complete data tracking which includes weekly reports and notes. DT Trainer offers a training program for both the teacher and student. As the student learns a target, that target is put on random and maintenance trials until complete mastery is accomplished. The program accommodates children from severe, low-functioning to typically developing young learners. DT Trainer is a wonderful breakthrough both for parents seeking an ABA software program to use at home or for professionals in need of a comprehensive program to track and manage the progress of students. View the training video at the site.

Price: US\$159

Software Requirements

Microsoft Windows 95, 98, 2000, ME, XP or Vista operating system (Windows NT not supported)
Microsoft Internet Explorer (IE) 5.5 or higher.
IBM Compatible PC with 200 MHz processor
64 Mb RAM
CD-ROM or DVD drive
700 Megabytes of free disk space
SVGA monitor
Multimedia system with sound card and speakers
Touch screen if student cannot use mouse

My Community CD-ROM

My Community teaches children and young people appropriate social behaviors, interactions, expectations and safety precautions with various peers and adults within their community. This CD incorporates video of real people interacting in different community settings such as a restaurant, doctor's office, friend's house, grocery store, and neighborhood and allows the user to predict what should be appropriately said or done next. This multi-level program targets individuals with a cognitive age of 5-15 years. This program is both Macintosh (OSX and above) and IBM PC compatible. View the demo video at the website.

Price: US\$96

System Requirements

Windows 95/98/2000/NT/Me/Vista operating system
Mac OSX or above
600 Megabytes of available Hard Drive Space
4x CD-ROM drive
16 bit color monitor, 800/600 Resolution or better Video card compatibility, Mouse or touch-screen

The Birthday Party CD-ROM

The Birthday Party CD-ROM is centered around the social interaction and language associated with a real life birthday party. It addresses the different emotions, space, volume and language that are appropriate for both the host and guests during a special birthday event. The child is first familiarized with the appropriate vocabulary and responses, then asked to implement them in 10 different birthday party scenarios. The program is separated into four levels in order to best match the child's level of function. It offers rewarding and challenging activities. The child and caregiver can chart their progress over time in order to follow and document gains made. This program is appropriate for children with the cognitive ages of 4-8 years old.

Price: US\$46

System Requirements

Windows 95/98/2000/NT/Me/Vista operating system
200 MHz or higher
300 Megabytes of available Hard Drive Space
4x CD-ROM drive, 16 bit color monitor, 800/600 resolution or better video card compatibility, Mouse or Touch-screen

My School Day CD-ROM

My School Day CD-ROM uses real life video to take the child into a typical school day, including the classroom, cafeteria, and playground! This program allows the child to view appropriate interaction and social behaviors within the school environment and interact! The child is asked to identify, produce and explain several social situations in response to real life video embedded in interactive software. Educators, parents and therapists can work with children using the program to target peer relationships, rules and rituals of the classroom, appropriate play at recess and appropriate lunchtime behavior. This program is an ideal tool to focus on conduct and activities at school! Appropriate for children with the cognitive age of 6-15 years old. View the demo video at the website.

Price: US\$96

System Requirements

Windows 95/98/2000/NT/Me/Vista operating system
200 MHz or higher
300 Megabytes of available Hard Drive Space
4x CD-ROM drive
16 bit color monitor
800/600 Resolution or better Video card compatibility
Mouse

School Rules CD-ROMs 1 & 2

Volume 1: Teaches acceptable behaviors during structured activities related to the classroom, group work, and physical education along with unstructured times of hallway interaction and lockers. This volume also targets the sensitive issues of PE locker room and personal hygiene. Target Cognitive Ages 8-18.

Volume 2: Teaches social interpretation skills during unstructured times where social rules are most challenging. This CDCD uses scenarios such as getting lunch, waiting in line, eating, talking to friends, or "just hanging out" to demonstrate social awareness. In addition, this volume also addresses time management, organizational skills and the use of schedules at school. Target Cognitive Ages 8-18.

Both programs are both Macintosh (OSX and above) and IBM PC compatible. View the demo videos at the website.

Price: US\$179 (2 CDs)

System Requirements

Windows 95/98/2000/NT/Me/Vista operating system
Mac OSX or above
200 MHz or higher
600 Megabytes of available Hard Drive Space
4x CD-ROM drive
16 bit color monitor
800/600 Resolution or better Video card compatibility
Mouse

Preschool Playtime 1 & 2

Preschool Playtime teaches the young child basic manners and behaviors such as greetings, interrupting, listening, waiting and apologizing through real-life social situations like a day at the park, in preschool or going to a play date. Unlike passive videos, this software allows the user to visually see the social interactions re-enacted by children and then choose what should be said or done next. In this fun, familiar, but safe environment, users can become increasingly aware of social expectations and more successfully interact with their peers.

This program includes 5 complexity levels and numerous videos to target a broad range of abilities. All levels include a fun and motivating social game of Duck, Duck Goose, Ring Around the Rosie, and Hide and Seek which is incorporated as the user plays the computer program. This program targets individuals with a cognitive age of 3-7 years and includes an easy-to-use lesson plan to customize the video sequences shown for each student.

The software automatically tracks each student's responses and provide a printout of their daily and long-term results, making social skills more objective.

Price: US\$132 (2 CDs)

System Requirements
