

AeroConnect One

RESEARCH AND CONSULTANCY DESK

Do you need to get a top line overview of the Singapore Aerospace Industry?

Are you looking to enter the Singapore Aerospace market and need relevant local comparative information?

Want to understand the Singapore market and the conditions in which you can conduct your business?

Perhaps you are putting up a presentation to your management and need more supporting information?

AAIS AeroResource Centre provides consultancy services, which will supply you with relevant local aerospace market information. We have conducted numerous research and competitiveness studies into the Singapore market, and have extensive local expertise to develop insightful reports for your reference. If you need more specific analysis, the AAIS AeroConsult Group, comprising of management consultants, technical experts and seasoned aerospace business veterans, will work towards developing a report for your specific needs. We can also supply you with a list of relevant contacts to make your inroads into the aerospace industry.

PACKAGE A: THE LANDING STRIP (US\$1,000)

- This package offers a macro view of the aerospace industry in Singapore, the various sub-sectors of the maintenance, repair and overhaul segment, and aerospace manufacturing segment.
- Understand the key players in the industry presently, and how the Singapore Aerospace market compares with its regional competitors.
- Receive information on overall growth trends in the market and latest developments in the Singapore Aerospace arena that might impact your business.

PACKAGE B: NUTS AND BOLTS (US\$2,500)

- On top of the macro view of the industry, as well as the regional competitiveness assessment, this package will customise an in-depth look into a segment or part of the industry of your choice.
- For example, if you are looking into the engine repair and overhaul market, details on the performance of the industry segment over the past 3-5 years will be provided, as well as projected growth of the industry for the next 5-8 years.
- This package includes the identification of potential partners as well as contacts in relevant agencies and companies in the Singapore aerospace industry.

PACKAGE C: MADE-TO-ORDER (Starting from US\$4,000)

- On top of the macro view of the industry, as well as the regional competitiveness assessment, this package will customise an in-depth look into a segment or part of the industry of your choice
- Moving deeper into facilitating business development, meetings with key personnel can be arranged for you to understand more about the market potential, as well as with relevant industry personnel and government agencies that can support you in your venture
- This package is highly customisable and a consultant will be allocated to work

full-time on your project to understand your needs and develop the research study based on your requirements.
